WELCOME TO THE FIRST EDITION

Well, here it is guys! Our first edition of our e-newsletter. We will try to get this out once every 3 months and keep you updated with some of the new products coming on to the market, party ideas, some interesting facts from within the balloon and party industry...and of course a chance to showcase some of our events with some stories! You can also enter our competition and win 10% of your next event decoration.

If you would like to see less, more or something else in this e-newsletter, please let us know by email, or if you have any suggestions or comments and feedback, please write to us, we are always excited to hear from you. Contact us on: info@partybuds.co.uk

MEET THE BALLOON CREW— ABOUT US

Paul

Paul is the person in the know about all the technical stuff. As a qualified Electrician and expert in Gases he is able to use his skill set and excellent knowledge of gas in most of our events, from making up the exploders for exploding balloons to drawing out technical plans. Also handy for carrying heavy cylinders of helium! Oh and he is also a brilliant balloon decorator.

Sue

Sue is the person who comes up with some weird and wonderful and sometimes seemingly unachievable designs... she thinks it through, stamps her little feet and suddenly it's achievable! Sue looks after the creation of the website and the administration and marketing of Party Buds. Oh and she is also a brilliant balloon decorator.

Caroline

Caroline is the person who brings an artistic flare to not only the balloons but also all those extras that Party Buds offers. As a keen arts and crafts person she can use her skills to blend balloons into those additional things you may have at your event such as flowers, materials, wall decorations etc. Caroline is our resident Topiary Queen and has set the record at making the fastest Topiary in the team.

Charly

Charly is our youngest member of the team; however despite her youth she keeps us all task focused on any job at hand. Charly loves to spend money and makes sure that Party Buds has all the very latest equipment to tackle any challenge you may want to set us. Charly is our resident column Princess and loves to put a spin on all the classic designs

To learn more about the team and see some of our work, visit our website: www.partybuds.co.uk

Helium!

We have all done it.. haven't we? Been to a party and for a laugh, grabbed a balloon, sucked in the helium and tried to sing like a munchkin?

As funny as it might be.. PLEASE don't do it!

It is dangerous.

Helium is an asphyxiant which means when the helium is inhaled it starves your brain of oxygen. This can lead to unconsciousness, brain damage and in some serious cases, death....**enough said!**

DID YOU KNOW?

- Did you know that balloons are a natural substance? The latex used to make the balloons comes from the sap of the rubber tree. →
- Foil balloons are not bio-degrade-able as they are made from aluminium and plastic. That's why they should never be released into the air.

Rubber Tree

NEW PRODUCTS ON THE MARKET

Bubbles are made of see-through, stretchy plastic. They inflate with smooth, wrinkle-free seams like a beach ball and look great from every angle.

Deco bubbles are non-allergenic as they are not made from latex and can last for weeks. With a variety of designs, you can really make a difference to your order bouquet of balloons and you get the added "last longer" value.

These deco bubbles are ideal for our corporate customers in sales showrooms as they last longer and do not lose their colouring or go "velvety" like normal latex balloons. Give one of our balloon crew a call to find out more about these amazing balloons.

"...Foil balloons should never be released into the air..."

CHARITY FUNDRAISING

Party Buds like to do their bit for charity, and the last few months we have really put our creative side into it!

Isabel Hospice Spotty Swim

When we were asked to help decorate a pool for a sponsored swim, our creative minds really took over.

With octopus and floating fish and reedy columns we created an underwater theme topped off by a seahorse made from balloons. Isabel hospice raised over £12,000 and still counting. If you would like to see some of the good work that Isabel Hospice do, please visit their website:

www.isabelhospice.org.uk

Herts Air Ambulance Fire & Ice Ball

Party Buds help decorate their "Fire & Ice Ball" at Hanbury Manor. Giving us the opportunity to really put our creativity to the test. With firey columns and icy snowflakes really set the scene for this themed night. Herts Air Ambulance raised a staggering £7,000 for the air ambulance trust. If you would like to see how you can help, visit their website:
